**#VLConf2018**

# Reflections on Day 2

# 5 things we need to do

- Be bolder with our nature-based solutions
- Increase collaboration across different disciplines to solve complex problems
- Identify the most important attributes that landscape led solutions can bring to benefit society, through the understanding of design, planning, management and science
- Consistently measure, quantify and value the things make the greatest difference to people, place & nature
- Communicate clearly the benefits gained and outcomes achieved
